Invitation

WCG STRUCTURAL FIREFIGHTING SUMMIT 2026

The Western Cape Disaster Management Centre, within the Department of Local Government, will be hosting a 2 Day Structural Firefighting Summit in partnership with Supporting Fire Services SA and Santam.

The Structural Firefighting Summit aims to provide a provincial forum for knowledge exchange, professional development and strategic alignment on modern structural firefighting practices. Structural fires continue to present significant risks to life, property and economic stability within the Western Cape.

While municipal fire services operate within established legislative and operational frameworks, evolving fire behaviour, modern building materials, and increasing urban density require continuous skills development and the adoption of contemporary firefighting methodologies.

Date: 13-14 August 2026

Time: 09:00 - 15:00

RSVP: Please email Ms. Lihle Dyani on Lihle.Dyani@westerncape.gov.za
